### Prepaid International Calling Service

Permits a residential caller to prepay a fixed amount applicable to international calls and make calls without having international access on the caller's line. The prepaid amount will be added to the caller's regular landline account and will be applied to calls made to countries specified at the tariffs noted below. A customer will be able to subscribe to this service by contacting Customer Service and specifying one of two prepaid amounts (SR 100 or SR 200) they want to subscribe to. After prepaid amounts are utilized, if further prepaid amounts are not added by the caller, regular international calling rates (specified in Item 10.1.5) will apply and calls will still be permitted if the caller has international access.
