

CITC Technical Specification

Specification for Satellite News Gathering Transportable Earth Stations and Ancillary equipment

Document Number: RI027
Revision: Issue 03
Date: 10/07/2021

Issued by The Communications and Information Technology Commission of Saudi Arabia in accordance with article 84 of the Telecommunications Bylaw.

Scope

This specification applies satellite news gathering transportable earth stations and ancillary equipment.

The SNG service is a communication technology offering a satellite based communication between ground based mobile terminals often used for the transfer of video and audio data between a mobile station in a vehicle and a central broadcasting stations during public events like the olympic games or the formula one.

Enforcement

This specification shall enter into force on 20/07/2021.

Any previous version of this technical specification is withdrawn.

General Requirements

- All equipment must comply with the requirement of CITC specification GEN001, be safe and must not adversely affect other electrical equipment.
- All telecommunications and radio terminal equipment must comply with the relevant technical specifications established by CITC. In addition, such equipment may be subject to regulations for Declaration of Conformity or registration. Please visit www.citc.gov.sa for details.
- If more than one interface type is offered by a piece of equipment, each interface must meet the applicable technical specifications.
- It is mandatory that test reports are obtained from a laboratory that has been accredited by a body that is a member of the ILAC Mutual Recognition Arrangement.

Limits and conditions

Testing should be carried out to ensure compliance with the listed specifications.

| Frequency band | Max Output Power or Magnetic Field | Usage | Standard | Comments |
|-----------------|------------------------------------|---------------|-----------------------------|----------|
| 14.0 – 14.5 GHz | Subject to licensing | SNG equipment | EN 301 430 EN 301 489-20 | |

Licensing Requirements

A spectrum license is required to use this service.

Additional Requirements

There is no additional requirements for this technical specification.

References

The following referenced documents are indispensable for the application of this document. If no issue or revision number is quoted along with the title of a technical specification or standard, the latest published version should be used.

EN 301 430

Satellite Earth stations and Stations (SES); Harmonised EN for Satellite News Gathering Transportable Earth Stations (SNG TES) operating in the 11-12/13-14 GHz frequency bands covering essential requirements under Article 3(2) of the R&TTE directive

EN 301 489-1

Electromagnetic compatibility and Radio spectrum Matters (ERM); Electromagnetic Compatibility (EMC) standard for radio equipment and services; Part 1: Common technical requirements.

EN 301 489-20

Electromagnetic compatibility and Radio spectrum Matters (ERM); Electromagnetic Compatibility (EMC) standard for radio equipment and services; Part 20: Specific conditions for Mobile Earth Stations (MES) used in the Mobile Satellite Services (MSS).

History

For reference, the latest versions of the technical specifications are published on the CITC website www.citc.gov.sa.
