## Schedule [4A] Wholesale Transmission Link Service

### 1. Description of Wholesale Transmission Link Services Pricing

- 1.1 The Wholesale Transmission Link Service prices have been created around a tiered discount structure. The service is designed to provide cost effective connectivity between large numbers of remote locations and small numbers of aggregation sites, using E1 or multiple E1 circuits. It also provides for higher bandwidth STM-1 and STM-4 services between aggregation sites.
- 1.2 Wholesale Transmission Link Service Pricing is available to Other Licensed Operators who hold either a mobile network operator licence or a data service provider licence.
- 1.3 The prices cover both Local and National circuits with a two stage pricing structure:
- Connection charges;
  - Annual rental charges.
- 1.4 The discount structure applies only to the annual rental charges and is related to the volume of circuits committed to on an annual basis, and is conditional upon the contract term.
- 1.5 The discount steps are intended to be a commitment from the service provider to STC. The circuits connected during each year will be charged at the step price. Failure to achieve the committed number of circuits will incur a penalty per circuit equivalent to the difference between the price that should have been paid for the actual circuits connected and the price for the committed number of circuits. STC reserve the right to recover any charges and additional investment required to meet the committed Transmission Link circuit numbers that have not been converted into firm orders during the contract period.

## 2. Charges<sup>1</sup>

## Outgoing And Incoming International Call Conveyance

### Schedule [4B] Wholesale International Outgoing Voice Call Conveyance Tariff

#### 1. Description

#### 2. Less than three (3) year commitment

2.1 A single stage discount structure based on the annual total International Outgoing Voice Call minutes commitment.

2.2 The proposed discounts for the Wholesale International Outgoing Voice Call traffic are applicable to facilities based OLOs and are based on the Initial Rates, these set at the STC Peak rate for international outgoing retail tariffs (effective 1<sup>st</sup> January 2006) and are detailed below.

Annual Minutes	Discount
0 – 299,999,999	35%
300,000,000 – 599,999,999	40%
600,000,000 – 899,999,999	45%
900,000,000 +	50%

2.3 Traffic levels will be reviewed on an annual basis. The annual minute thresholds are commitment levels; failure to achieve the committed volumes will result in the lower commitment threshold price being applied retrospectively to the annual minutes and a penalty payment levied to the value of the difference between committed level price and the achieved level price.

2.4 The “Initial Rate” is not linked to the prevailing retail tariff and therefore is not subject to change in line with any proposed amendments to the outgoing International retail prices. However, if the wholesale rate discount becomes less than 12% below prevailing retail peak price, for any individual country, that country’s individual rates will be reviewed to ensure that a minimum 12% discount exists.
