1. **FRAMEWORK**

- 1.1. Pursuant to Article 41 of the Telecommunications Bylaw (the Bylaw), and Clause 3.1 of the Interconnection Guidelines, STC publishes this Reference Interconnection Offer (RIO) which provides a set of standard technical and commercial terms and conditions for interconnection and forms the basis for entering into an interconnection agreement between STC and any requesting Other Licensed Operator (OLO).
- 1.2. Pursuant to Article 38 of the Bylaw and decision no. 1/1423 of CITC, STC has been designated as being a Dominant Service Provider in the Kingdom of Saudi Arabia. The provisions of this RIO comply with the requirements of the regulatory framework as set out in the Telecommunications Act, the Bylaw, the Ordinance of the Communications Commission and the Interconnection Guidelines. In particular, the specific obligations arising under the regulatory framework relating to Dominant Service Providers are observed herein.
- 1.3. STC hereby offers to interconnect the STC Network with the Network of a requesting Other Licensed Operator and to supply services and facilities on the terms and conditions as provided for in this RIO. STC undertakes to act in good faith in the negotiation of a Network Plan with any Other Licensed Operator.
- 1.4. The Other Licensed Operator, by requesting interconnection with STC, warrants that it has in full force and effect the authorisations stipulated in the Interconnection Guidelines to enter into an agreement arising from an acceptance of this RIO.

- 1.5. STC and the requesting Other Licensed Operator recognise the necessity of effective interconnection of their Networks in the provision of quality Telecommunications Services to their respective customers. STC and the Other Licensed Operator believe that a fundamental principle of interconnection is to enable customers of STC and the Other Licensed Operator to communicate effectively with customers of the other Network and that accordingly:
- 1.5.1 STC and the Other Licensed Operator shall exchange information in order to make interconnection effective, without prejudice to commercial confidentiality.
- 1.5.2 STC and the Other Licensed Operator shall at all times, as far as is reasonably possible, act so as to facilitate the speedy and effective operation of interconnection services set out under this RIO, to the benefit of customers and to their mutual advantage.
- 1.5.3 STC and the Other Licensed Operator will cooperate to achieve feature transparency of supplementary services between interconnected networks as far as is reasonably possible.
- 1.5.4 STC and the Other Licensed Operator shall provide to each other, upon request, details of active number ranges and shall be obliged to advise each other from time to time of the opening of any new number ranges in accordance with the National Numbering Plan approved by CITC.
- 1.5.5 STC and the Other Licensed Operator shall work jointly to ensure the overall quality of the calls which are made via an interconnection point and their own networks. STC and the Other Licensed Operator shall adopt general principles regarding standards, techniques and methods in order to guarantee the quality of telecommunication networks and in services, as stipulated in ITU-T and ETSI appropriate technical standards.
- 1.5.6 In implementing services and facilities under this RIO, STC and the Other Licensed Operator shall endeavour to minimise the attendant costs, provided that this does not result in additional cost attribution to other products and services

provided by either STC or the Other Licensed Operator and is consistent with agreed quality standards.

- 1.5.7 STC and the Other Licensed Operator shall treat each other in a fair and Professional manner.

2. DEFINITIONS AND INTERPRETATION

- a) The Telecommunications Act
 - b) The Ordinance of the Communications Commission
 - c) The Telecommunications Bylaw
 - d) The Interconnection Guidelines
- 2.3. In the event of conflict or ambiguity between the provisions of the Interconnection Guidelines, this RIO (including any attachments, appendices or annexes hereto) and any Interconnection Agreement entered into between STC and an Other Licensed Operator pursuant to negotiations based on this RIO, and subject to Clause 2.1 hereof, the following order of precedence shall apply:
- a) The Interconnection Guidelines

 - c) Any Interconnection Agreement pursuant to this RIO.

3. NETWORK INTERCONNECTION

- 3.1. Interconnection between the STC Network and the Other Licensed Operator's Network at each Point of Interconnection shall be achieved through two or more Interconnect Links. Each Interconnect Link shall create a connection between one of the STC Service Nodes and one of the Other Licensed Operator's Service Nodes. Details of how this shall be achieved are set out in Annex C (*Technical Information*). Interconnection is available at each of the STC Interconnect Nodes listed at Annex C Attachment 2. The Other Licensed Operator may interconnect at any of these Interconnect Nodes subject to that Interconnect Link being bi-laterally agreed in the Network Plan. The technical standards supported by the STC Network for the purposes of Interconnection are set out in Annex C (*Technical Information*) as amended from time to time.
- 3.2. On requesting Interconnection from STC, the Other Licensed Operator shall:
- 3.2.1 Provide a detailed statement of its technical requirements for Interconnection Services in respect of this RIO. This statement of requirements must be sufficiently detailed for STC to design a solution for the Other Licensed Operator's interconnection requirements.
- 3.2.2 If the statement of requirements is considered by STC to be insufficient to set out a comprehensive technical solution, STC shall notify the Other Licensed Operator within five (5) Business Days of receipt of the statement of requirements. This notification shall include a list of detailed questions and requests for data that are not supplied within the Other Licensed Operator's statement of requirements.
- 3.2.3 If the statement of requirements is sufficient to enable STC to design and document a comprehensive technical solution for the Other Licensed Operator's interconnection requirements, STC shall dispatch a documented solution to the Other Licensed Operator within one (1) Calendar Month of receipt of the satisfactory statement of requirements.

- 3.2.4 STC and the Other Licensed Operator shall negotiate in good faith with a view to reaching agreement on a comprehensive Network Plan within one (1) Calendar Month of STC's notification of the STC proposed technical solution being received by the Other Licensed Operator, unless otherwise agreed between STC and the Other Licensed Operator in writing.
- 3.2.5 Once the technical solution is agreed between STC and the Other Licensed Operator, the solution shall become known as the Network Plan and shall be included in the proposed Interconnection Agreement between STC and the Other Licensed Operator.
- 3.2.6 Interconnect Paths shall be provided using either Customer Sited Interconnection as defined in Service Schedule (3A) (Interconnect Link Services) of Annex G (*Service Schedules*) hereto, or links via Other Licensed Operator equipment sited at STC collocation facilities, as defined in Service Schedule (5A) (Interconnection Equipment Collocation Services) of Annex G (*Service Schedules*).
- 3.2.7 The actual Point of Interconnect (POI) shall be where the STC Network connects with the Other Licensed Operator Network and shall be a physical point where the connection can be disconnected in order to conduct testing.
- 3.2.8 STC and the Other Licensed Operator shall be responsible for providing sufficient capacity at the POI to meet the agreed forecast traffic contained in the Network Plan, as described in Annex H (*Operations and Maintenance Manual*).
- 3.2.9 Each Licensed Operator will own and shall be responsible for the operation and maintenance of the transmission equipment on their respective sides of the POI up to the Digital Distribution Frame (DDF).
- 3.2.10 Separate Interconnect Paths may be provided to carry the traffic of each Licensed Operator. The cost of both installation and ongoing maintenance of each Interconnect Path shall be borne in full by the Licensed Operator owning (sending) the traffic on that Interconnect Path. Initially Uni-directional paths will be utilised. Bi-directional paths may also be utilised when this represents the

optimal method of handling the traffic consistent with sound engineering practices. In the latter instance of Bi-directional paths, costs for installation and ongoing maintenance shall be shared. The terms and conditions for STC Interconnect Link Services are attached in Annex G (*Service Schedules*) and the Annex F (*The Price List*) hereto.

3.2.11 The ordering periods for new Interconnect Links shall be as defined in Annex I (*Quality Of Service Measures*).
